

Notice to Members

Beverage Price Adjustment

Effective Monday 9 November 2026

Club Stockton advises members that revised beverage prices will take effect from Monday, 9 November 2026.

This will be the Club's first general beverage price adjustment since 25 September 2023. Over the past three years, the Club has absorbed significant increases in supplier costs, wages, utilities, alcohol excise and other operating expenses.

The revised pricing has been carefully reviewed against comparable local venues to ensure member prices remain competitive while also supporting the Club's ability to continue providing quality facilities, services and experiences for our members.

The following member price adjustments will apply:

- Mid-strength tap beers: **increase of 50 cents per schooner**
- Mainstream full-strength tap beers: **increase of 40 cents per schooner**
- House wines: **increase of 50 cents per 150ml glass**
- Selected spirits, wines and other beverages: **increase of up to 50 cents per serve**

While no price increase is ever welcome, these adjustments are necessary to help offset rising operating costs and ensure the long-term sustainability of the Club.

We thank you for your understanding and sincerely appreciate your continued support of Club Stockton.

John Richards
